

## CASE STUDY: OUT OF BOX ACADEMY (OBA)

# Revolutionising Educational Safety and Efficiency

### Objectives

OBA aimed to elevate safety and efficiency within its entire chain of centres, fostering a nurturing environment conducive to learning. The solution needed to be scalable to accommodate OBA's growth plans for the future.

### Challenges

**Ensuring Holistic Well-being:** Prioritising a safe and comfortable learning environment.

- Maintaining Robust Security:  
Balancing proactive interventions with real-time monitoring capabilities to ensure student and staff safety.
- Optimising Resource Management:  
Balancing energy efficiency with maintaining comfortable temperature and air quality within the learning spaces.

**Scaling Operational Efficiency:** As OBA expands, effective management becomes critical.

- Centralise Oversight: Streamline operations across multiple locations without sacrificing individual centre attention.
- Optimise Staffing: Ensure efficient manpower allocation across the growing number of centres.

### Solution

#### WMSmartSuite – Early Education

- WMVision
- WMSmartAccess
- WMSmartFacilities
- WMAttendance

### Benefits

- Enhanced safety with proactive interventions and real-time monitoring.
- Improved operational efficiency through centralised management.
- Reduced costs through optimised energy usage and streamlined operations.
- Sustainable practices with smart facilities management.
- Nurturing learning environment with optimal air quality and temperature control.
